About me

I am a B.Tech CSE student with a passion for Cybersecurity, Backend Development, and Web Development. I enjoy coding, working on both backend and frontend systems, and managing databases. Always eager to learn, I have gained hands-on experience through projects and hackathons. With strong problem-solving skills, I am excited about building innovative tech solutions.

Education

Name of course	Passing year	Name of institute	CGPA
B. Tech	2027	JK LakshmiPat University	7.53
Class XII, BOARD	2023	MPS International, Jaipur	8.9
Class X , BOARD	2021	MPS International, Jaipur	8.6

Internships Experience

Intern at, AI Shipshape, (Reading, UK United Kingdom) (May 2025 - August 2024)

- Gained hands-on experience in **Full Stack Development** using **React.js, Node.js, Express.js, and MongoDB**.
- Contributed to the **frontend design of the official company website**, improving layout, usability, and visual consistency.

Projects

Intelligent API Abuse Detection System

- Designed and implemented a Spring Boot-based middleware to monitor and log API usage behavior at the application layer.
- Analyzed API call patterns to detect abusive behaviors such as endpoint looping, excessive use of expensive APIs, and automated access.
- Integrated a machine-learning sequence model (transformer-based) to identify abnormal usage patterns beyond simple request counting and Implemented JWT-based authentication and severity-driven responses.

Phishing Shield – Cybersecurity Project

- Built a real-time phishing detection and website categorization system to protect users from malicious websites.
- Technologies & Tools: Python, Machine Learning (XGBoost, Random Forest), Flask (REST API), Chrome Extension (JavaScript), HTML, CSS.
- Implemented privacy-preserving local analysis, real-time alerts, and category-based website blocking.

Problem Statement: AI-Enhanced Career Guidance System for Personalized Career Pathways

- Collaborated with a cross-functional team including a senior to design and prototype an AI-powered system offering tailored career recommendations for students and professionals.
- Developed a solution that analyzed user profiles aptitude, aspirations, abilities, and experience to suggest optimal career paths using machine learning and rule-based logic.
- Gained hands-on experience in problem-solving, rapid prototyping, and applying AI for impactful real-world applications.

Skills & Tools

Programming Languages:

C, Java, JavaScript,

Web Development:

HTML, CSS, React.js

Backend:

, Node.js, Express.js, Spring Boot, Maven, REST APIs, JWT Auth

Databases:

MySQL, MongoDB, PostgreSQL

Tools & Technologies:

Git, GitHub, VS Code, Cursor

Skills & Tools

Language: Hindi, English, German

Soft Skills: Team Player, Curious to learn new things

Interests: Travel and Art
